

CSS Homework

Exercise

Requirements

- Proper HTML5 page structure
- Use of classes and ids
- Proper use of CSS to apply styling
- Position HTML elements properly using CSS

Instructions

For this assignment you will recreate the HTML and CSS in the link below. Try not to use the developer tools on the website below. I want you to recreate the structure on your own.

Here is the link to site you must recreate - [Page Title \(w3schools.com\)](#)

NOTE: This assignment is not using Bootstrap and does not need to be responsive.
